

AJAY KUMAR KUPPUSAMY

Software Engineer — Full Stack Java Developer | Bangalore, India

☎ +91 877-809-8369 ✉ ajaykumarkuppusamy@gmail.com [in linkedin.com/in/ajay-kumar-kuppusamy](https://www.linkedin.com/in/ajay-kumar-kuppusamy) [GitHub](https://github.com) [LeetCode](https://leetcode.com)

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL

Backend: Spring Boot, Microservices, REST APIs, Kafka, Redis

Architecture: System Design, CI/CD, Agile

Frontend: ReactJS, Angular, Redux, Ant Design

Cloud & Tools: AWS (EC2, Lambda), Docker, Git, Maven, JUnit

EXPERIENCE

Software Engineer | Project: 1Pay (Client: Unilever)

Jan 2025 – Present

J3Soft (Contract) → ITTI (Full-time)

Bangalore / TN

- Collaborated within a 4-member agile development team to build Unilever's **1Pay** system, supporting salary workflows for **30,000+** employees with zero critical defects in production.
- Designed and implemented the core salary calculation engine using **Spring Boot** and **Angular**.
- Refactored legacy **PostgreSQL** queries and optimized indexing, reducing financial report generation time by **35%**.
- Managed containerized microservices deployments on **AWS EC2** and maintained robust **CI/CD** pipelines.

Module Lead | Project: Borewell Management System

Feb 2024 – Dec 2024

J3Soft

Tamil Nadu, India

- Led end-to-end architecture (HLD/LLD) and deployment of a centralized, full-stack resource management suite from scratch.
- Developed 150+ RESTful endpoints in **Spring Boot** to handle complex enterprise data workflows and secure onboarding.
- Engineered an asynchronous reporting engine, reducing export latency by **60%**, and optimized **MySQL queries and indexing** for sub-second response times.
- Built responsive **Angular/React** UIs and implemented role-based access control (RBAC) using **Spring Security**.

OPEN SOURCE CONTRIBUTIONS

Adaptive Session Manager (NPM) | TypeScript, Node.js | [npm](https://www.npmjs.com/package/adaptive-session-manager) [GitHub](https://github.com)

2026

- Engineered and published a modular TypeScript library for stateful user session tracking, featuring automated timeout triggers and lifecycle hooks.
- Architected optimized distribution builds via **Vite**, enforcing absolute type safety and compile-time validation via strict **TypeScript** configurations.
- Authored deterministic unit tests to mock storage environments, ensuring runtime state predictability and edge-case reliability.

PROJECTS

AI-Powered Stock Portfolio Tracker | Spring Boot, React | [Live Demo](#)

2026

- Developed a full-stack portfolio tracker using **Spring Boot**, **React**, and **MySQL**, deployed securely via **Docker**.
- Engineered an AI insights engine using **Google Gemini API** to analyze stock performance and generate automated market summaries.
- Integrated **Yahoo Finance APIs** for real-time market data, computing realized/unrealized P&L and XIRR analytics.
- Implemented secure **JWT authentication** and a **voice-command** interface for hands-free trade logging.

EDUCATION

B.E. in Electronics and Communication Engineering - 81.2%

2020 – 2024

Dr. N.G.P. Institute of Technology

Anna University, Tamil Nadu

ACHIEVEMENTS

- 0-to-1 Leadership:** Architected and delivered an enterprise management suite successfully from scratch as a fresher.
- Career Progression:** Transitioned from a contract Software Engineer at J3Soft to a full-time Software Engineer at ITTI while continuing development of Unilever's 1Pay platform.
